Subject: Coments on the Dermal Cancer Slope Factor proposed for Benzo(a)pyrene.
Attachments: EPA-HQ-ORD-2011-0391 API Comments BAP DCSF_no_coverletter.pdf

Dear discussants for the June 29 EPA IRIS science meeting,

The attached comments have been submitted to the Docket in response to issues arising from the draft "Toxicological Review of Benzo[a]pyrene: In Support of Summary Information on the Integrated Risk Information System (IRIS)". We understand that it may sometimes take days for submitted documents to be posted to a docket. We have attached these comments to maximize the time available for consideration of our submission.

These comments were prepared at the request of the American Association of Railroads, the American Coke and Coal Chemicals Institute, the American Petroleum Institute, the Asphalt Institute, and the Paving Coatings Technology Council. We appreciate the opportunity to provide these comments.

Respectfully,

Patrick Beatty PhD
